Art Unit: 2818

# **DETAILED ACTION**

- 1. Applicant's election of Group II that directed to claims 8-13 for examination in Page No. 8 is acknowledged.
- Claims 14-26 were newly added and depended on the elected claims.
- 3. Claims 8-26 are presented for examination.

## Information Disclosure Statement

4. The information disclosure statement submitted on 01/31/03 was filed after the mailing date of the Application on 02/13/01. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the petition is granted and the information disclosure statement is being considered by the examiner.

# Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

<sup>(</sup>b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 09/783,069

Art Unit: 2818

6. Claims 8-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Skrovan et al., U.S. Patent No. 6,110,830.

Regarding to claims 8-9, Grieger et al. discloses the method of planarizing a surface by introducing ozone containing solution onto the surface (abstract). It would have been inherent that the polishing pad and the surface would have been in contact in planarizing process and the solution used would have caused relative motion between the polishing pad and the surface.

## Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 10-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Skrovan et al., U.S. Patent No. 6,110,830.

Regarding to claim 10, it would have been obvious that an aqueous solution for chemical mechanical planarizing process contains abrasive to remove dissolved layer.

Regarding to claim 11, Skrovan et al. discloses that the abrasive particle is aluminum. It would have been well known in the art that abrasive particles are well known such as alumina, silica, ceria, spinel, zirconia, and mixture thereof.

Page 4

Application/Control Number: 09/783,069

Art Unit: 2818

Regarding to claims 12-13, it would have been obvious to any person having skill in the art that ammonium salt such as ammonium carbonate would have been widely used in solution for chemical mechanical planarizing process.

Regarding to claims 14-16, it would have been obvious in the art to use material selected from a group consisting of iridium, iridium oxide, platinum, any low k material to make the surface, and to use a structure such as a hard disk or a micro electrical mechanical structure to form the surface structure.

Regarding to claims 18-26, it would have been obvious in the art that the temperature and concentration of the solution would have been a matter of design choice.

#### Conclusion

- 9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thao P Le whose telephone number is 703-605-1187. The examiner can normally be reached on M-T (8:00-6:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on 703-308-4910. The fax phone numbers

Application/Control Number: 09/783,069

Art Unit: 2818

for the organization where this application or proceeding is assigned are 703-308-7722 for regular communications and 703-308-7722 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
